

AVATAR BUDDY

Client Testimonial

Kim Neal

Pump Up Profits LLC

Quicker Onboarding Success

I have been using Avatar Buddy for about 3 months now, and it has *significantly transformed* the way I provide value to my clients, as well as *increased my productivity*, sales and profit margin. The intuitive interface and customizable features have made it incredibly easy to tailor the application to meet my unique needs.

As a Fractional CFO, one of the areas I usually spend considerable time in is learning the client's ERP software so I can be of immediate benefit. Avatar Buddy provided me with step-by-step tutorials and interactive guides that walked me through the features and functionalities of the software. This enabled me to quickly understand and retain information more effectively, and I was able to complete an initial assessment for the client in *3 days instead of the week* it usually takes me to get up to speed. Avatar Buddy offered me personalized learning paths tailored to me at a CFO experience level. This customization allowed me to focus on the most relevant aspects of the client's software, thus accelerating my learning process.
